### **CIRCULAR MEMO**

The 9 AS Project in Police Offices in the State was sanctioned by the Govt. of Maharashtra in 2007 as a part of the State e-Governance Policy. Under this project it is proposed to create a network of all state level, regional level and unit level police offices in the State with a view to ensuring speed, accuracy and convenience in the day to day administrative and operational functions. 9 different modules and the web-site are part of this project which was launched with the initial sanction of Rs. 1.69 Crores.

2. As a part of implementation of this project it was desired that the master data from all offices is uploaded accurately in a time-bound manner and efforts are made with the help of the service providers to train the personnel of all offices in operating this system.

3. It has however been brought to my notice that the supervisory officers and personnel of all branches and units are not taking adequate interest in this important work thereby delaying the project and escalating the project cost. This is a very serious matter and calls for urgent corrective steps at your end.

4. The chart showing the present status of implementation along with the deficiencies noticed so far is enclosed. I would expect you to take personal interest in this matter, brief your officers/personnel, fix the responsibility for time-bound implementation and complete the work by 15<sup>th</sup> December 2009 positively. The progress should be reviewed every fortnight and lapses if any should be reported.

  
(A.N.Roy)

Director General of Police  
Maharashtra State, Mumbai.
