2. For mobile device user will have to install the application from **Google play store** by searching "**Kavach Authentication**" and then verify the account by logging into application after installation.

3. An OTP will be generated for one time verification. After verification an enrollment number will be displayed on the application which keeps changing in every 30 seconds.

a) Once the user enters username and password into email.gov.in and clicks on **sign in**, a notification will come on user mobile device asking to "**accept**" or "**decline**" the login. Once the user clicks on accept the user will automatically login into email.gov.in.

b) Second way is to use the enrolment number shown at that moment on the application in continuation with your password. Suppose my password is Apple, then I will enter Apple123456 where 123456 is the enrolment number displayed by the application at that moment.
